Abstract

RozKa is a website and app-based monthly cab subscription service designed for daily commuters, allowing customers to select their pick-up times for a scheduled doorstep service. Operating along fixed routes with strategic partnerships with travel agencies for cabs and companies for customers.

Architecture Diagram

Significance of the Project

RozKa provides an affordable, convenient transportation solution for daily commuters through scheduled pick-ups along fixed routes. By partnering with travel agencies and companies, it optimizes cab usage and reduces traffic congestion. This enhances urban mobility, offering a reliable alternative to traditional commuting methods.

Conclusion

In conclusion, RozKa offers a sustainable and efficient solution for daily commuting by integrating technology with reliable, shared cab services. Its innovative approach reduces travel costs, traffic congestion, and environmental impact while enhancing convenience for users. RozKa stands to redefine urban mobility, making everyday travel smoother and more accessible.
